```javascript
// monetization/components/ad-slot.js

import React, { PureComponent } from 'react'
import { connect } from 'react-redux'

export class AdSlotBase extends PureComponent {
  render() {
    return (
      <pre>
        <code>{ this.props.dfpID }</code>
      </pre>
    )
  }
}

const connectAdSlot = connect(
  (state, ownProps) => {
    const slot = state.monetization.adSlots[ownProps.id] || {}

    return {
      dfpID: slot.dpfID,
    }
  }
)

export default connectAdSlot(AdSlotBase)
```
